A one-day course that provides an introduction to economic evaluation in health and health care. The course includes:

- An introduction to economic concepts and the health technology assessment framework
- An understanding of economic outcomes including utility-based quality of life
- Estimation of total costs with a focus on routinely collected data
- Calculation of cost effectiveness
- An understanding of the policy process with regards to the Pharmaceutical Benefits Advisory Committee and the Medical Services Advisory Committee

No prior knowledge of economic evaluation is required.
